Recommendation Letter

This is to certify that **MAKE Enterprise** has successfully implemented 'Ethiopian Medical Association electronics Continual Professional Development (eCPD) system & Resource center, and Ethiopian Medical Association online Ethiopian Medical Journal (EMJ)' which promotes our association to up level in terms of its journal reachability and enabling the competence of its members by delivering online learning and counting the value of their attendee as professional development practice.

We recognized the need to implement eCPD system which fulfills our requirements completely, and will enable our members to comply with our country competence level by allowing them to access online learning and professional development courses that leads them to accumulate the effort they exerted in forms of CEU. Moreover, we recognized to enhance our printed Journal to online Journal system, which enables the reachability of the journal throughout the world.

To accomplish the requirement, we needed a highly professional IT Partner and we found **MAKE Enterprise** suitable and competent to implement the solution for us.

Both projects were successfully completed by consultants from **MAKE Enterprise** whose service has been exemplary, both at the professional and knowledgeable levels.

Ethiopian Medical Association appreciates the efforts and commitment of MAKE Enterprise. We highly recommend their professional & well-rounded technical team. We will continue to partner with MAKE Enterprise for our future needs.

For and on Behalf of Ethiopian Medical Association

Abiy Hiruye, MD, MPH
Executive Director
Ethiopian Medical Association
